

# Autumn

## New Words...

migration:

if a bird or animal migrates, it travels to another part of the world for warmer weather at a particular time of year

tenacity:

perseverance and determination;  
a mind-set of not giving up

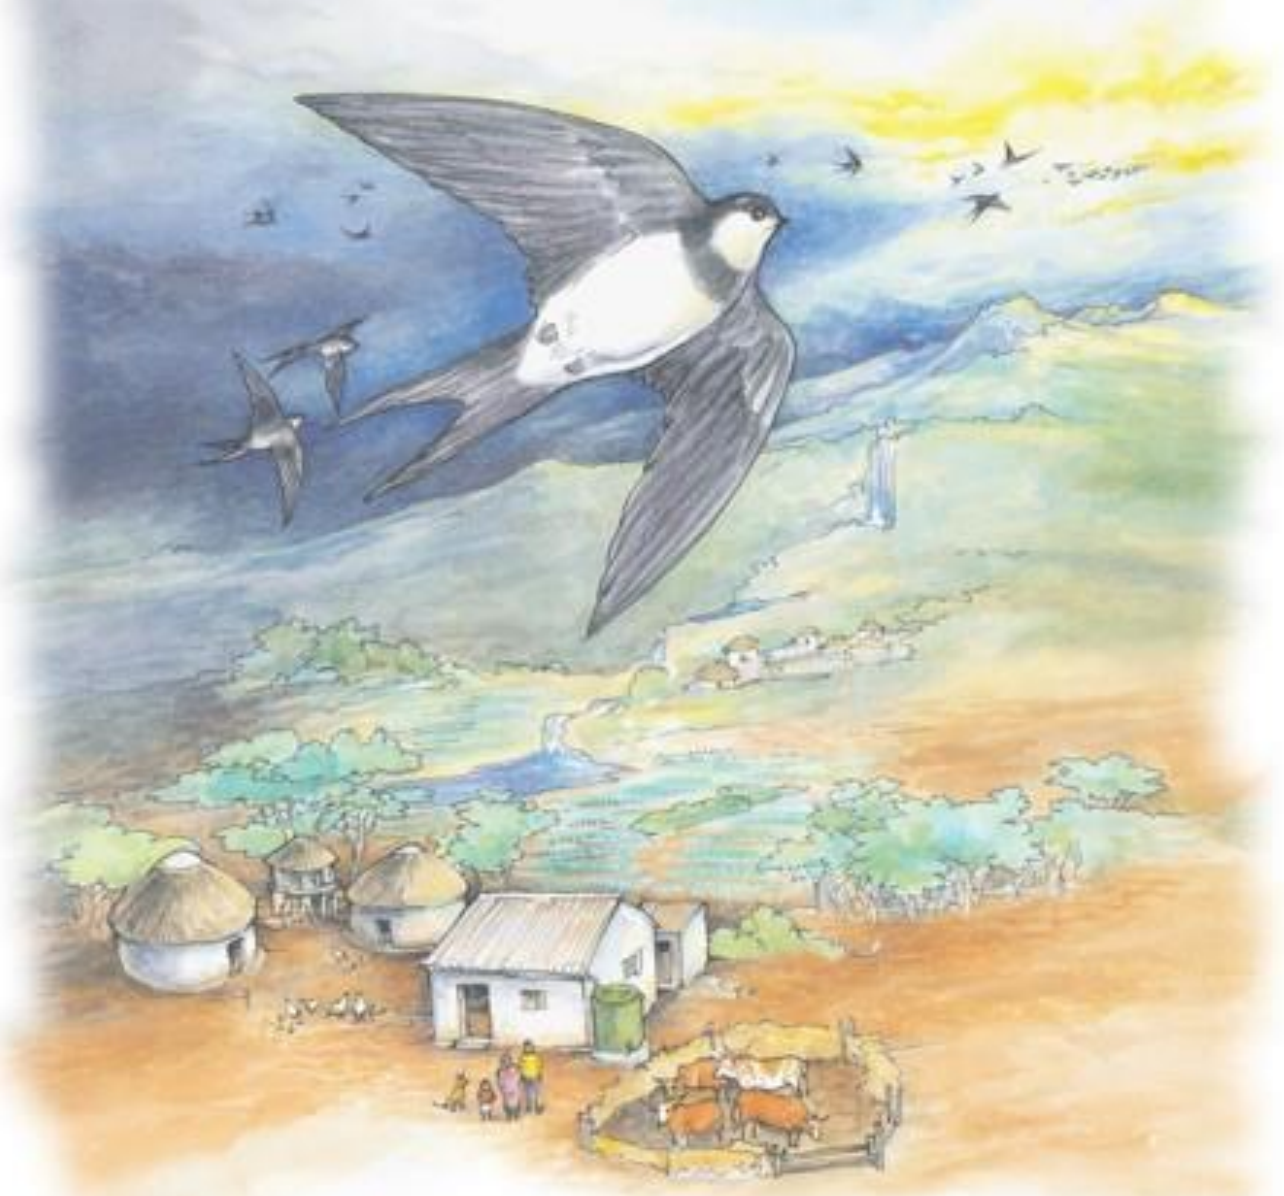

## Good Morning Autumn!

The sky is grey and the wind is cold,  
leaves are falling and the grass is old.  
Wear something warm if you're out to play.  
Autumn's here, Winter's on the way.

## Good Morning Autumn!

Millions of birds don't like to be cold.  
When Autumn arrives they must be brave and be bold.  
With courage they fly far over land and blue sea.  
With no map to guide them, just plain tenacity.

They'll land in far off places where Spring is in the air  
and enjoy the warm sun while we shiver back here.

# Spring

## New Words...

fledgling:

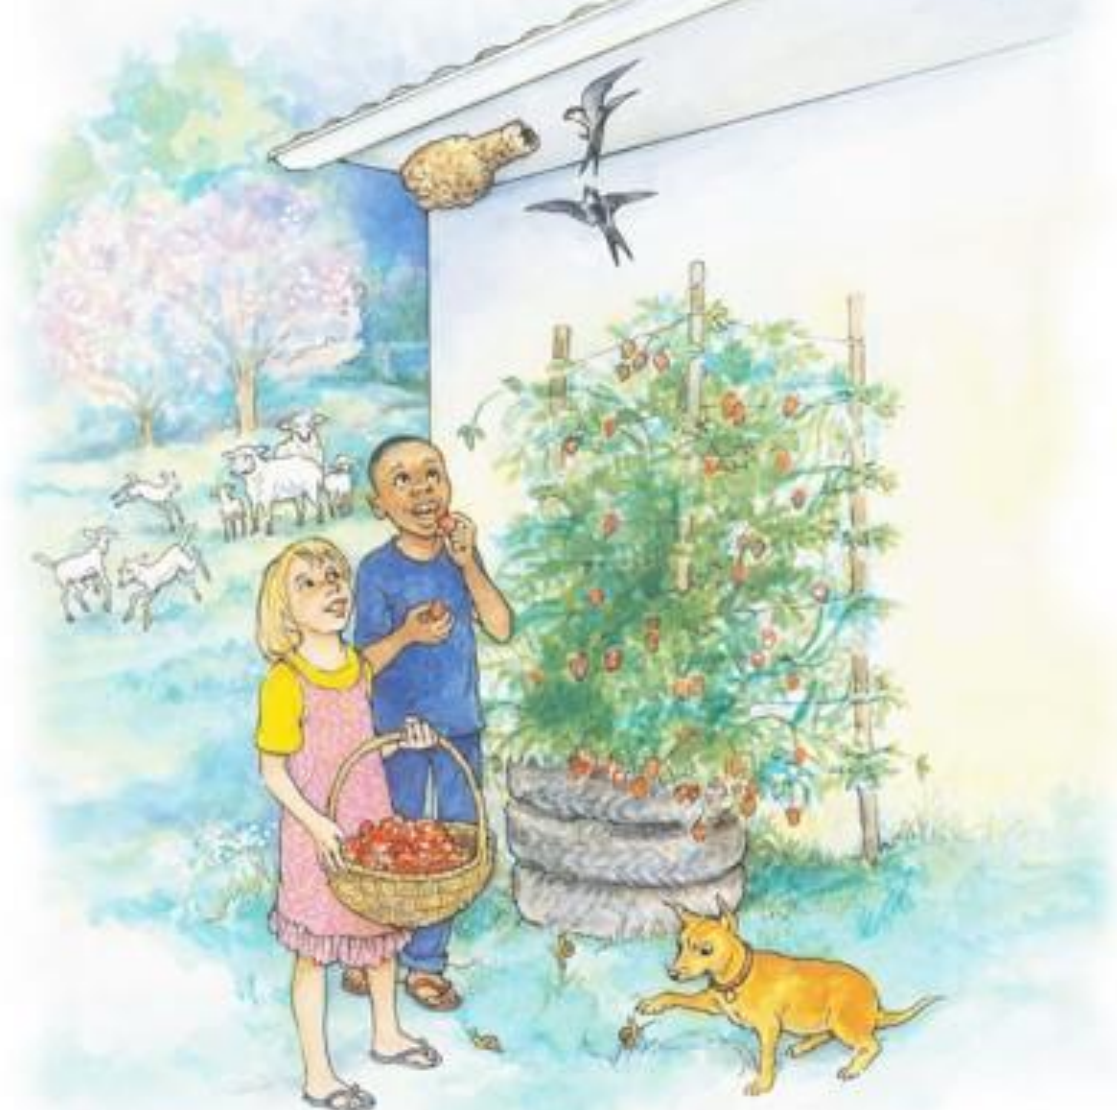

a baby bird is called a fledgling  
when it has just learned to fly

molting:

seasonal shedding of old feathers, hair, or skin  
to make way for new growth

## Good Morning, Spring!

Some say Spring is the best time of year.  
Birds that flew off when Winter was near  
fly back now to join us in time for the sun.  
We peel off our jerseys and join in the fun.

There are lambs in the fields and baby birds in the nest.  
It's a time of new birth, new beginnings...  
And for me... it's the best!

## Good Morning, Spring!

My fluffy dog needs brushing.

His winter coat's too hairy!

And I've swopped my woolly jersey  
for a shirt that's cool and airy.
