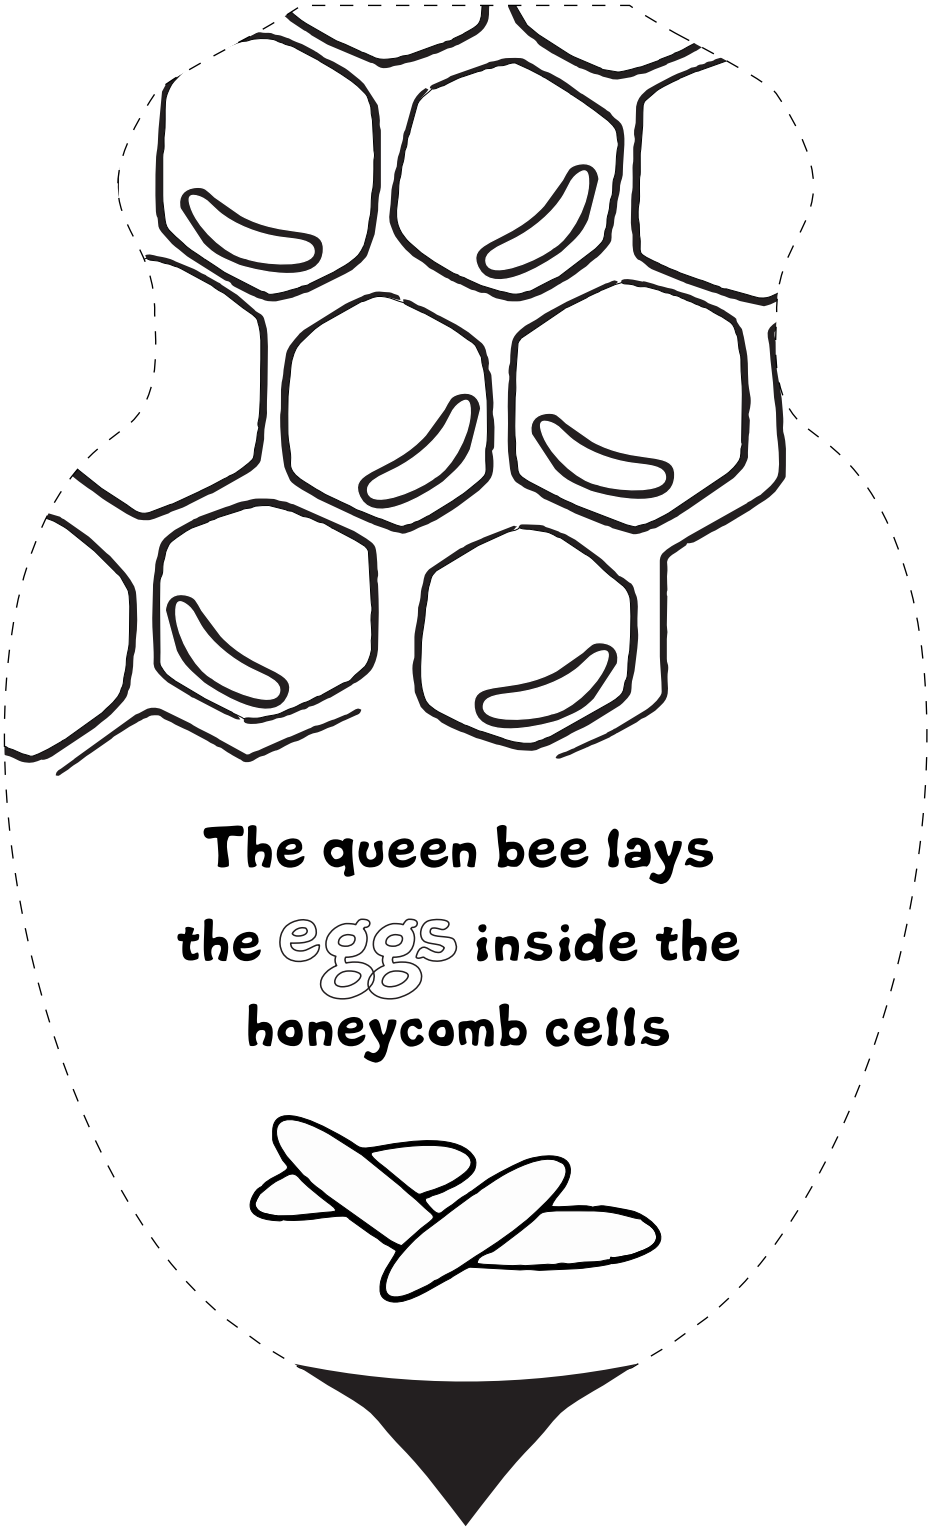
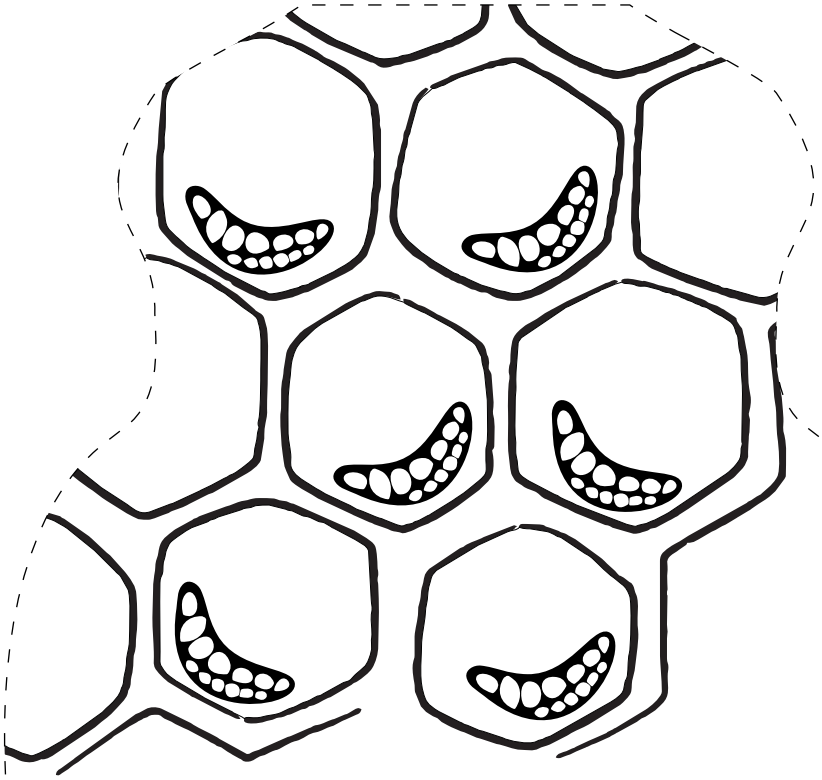
Page 1

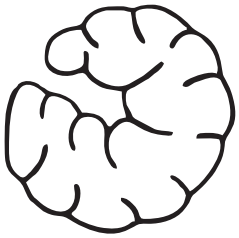


The queen bee lays the eggs inside the honeycomb cells

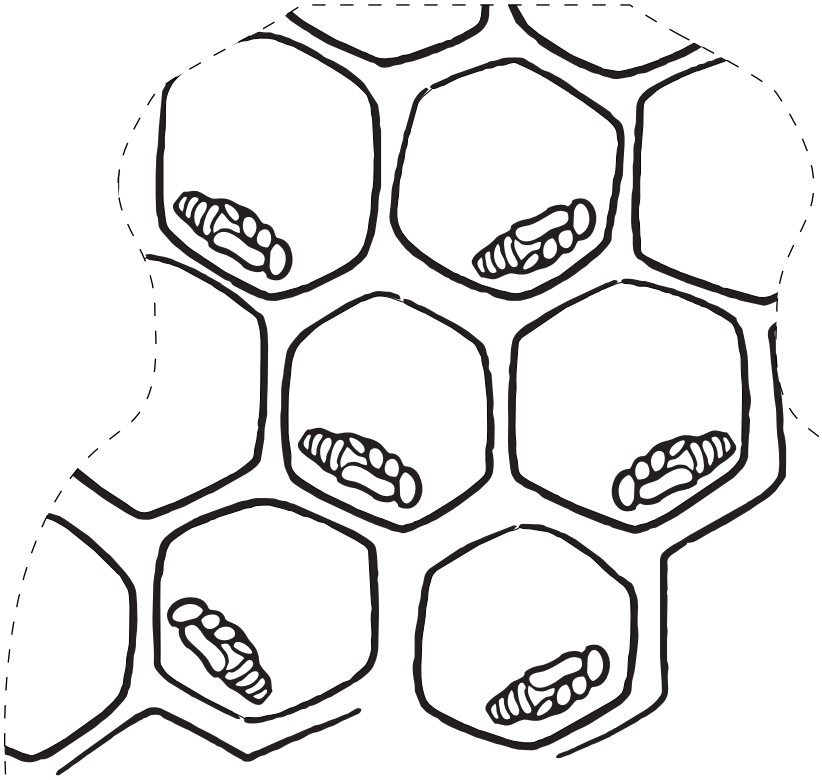
Page 2



The larva hatch
from the egg
in 3 - 4 days

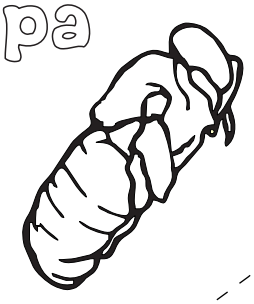


Page 3

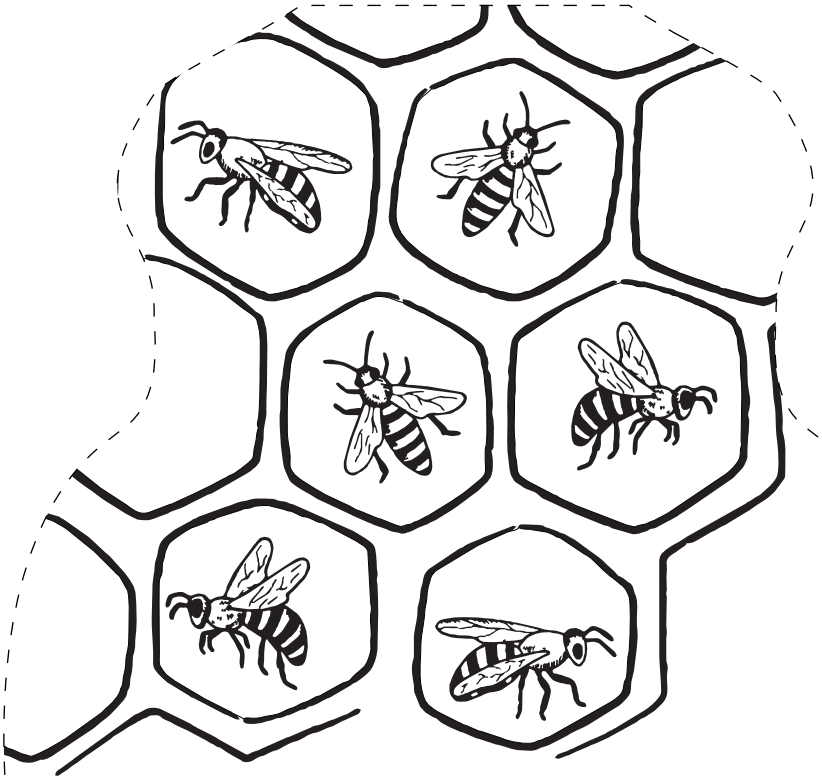


The larva is fed by
worker bees
and develops into a

pupa

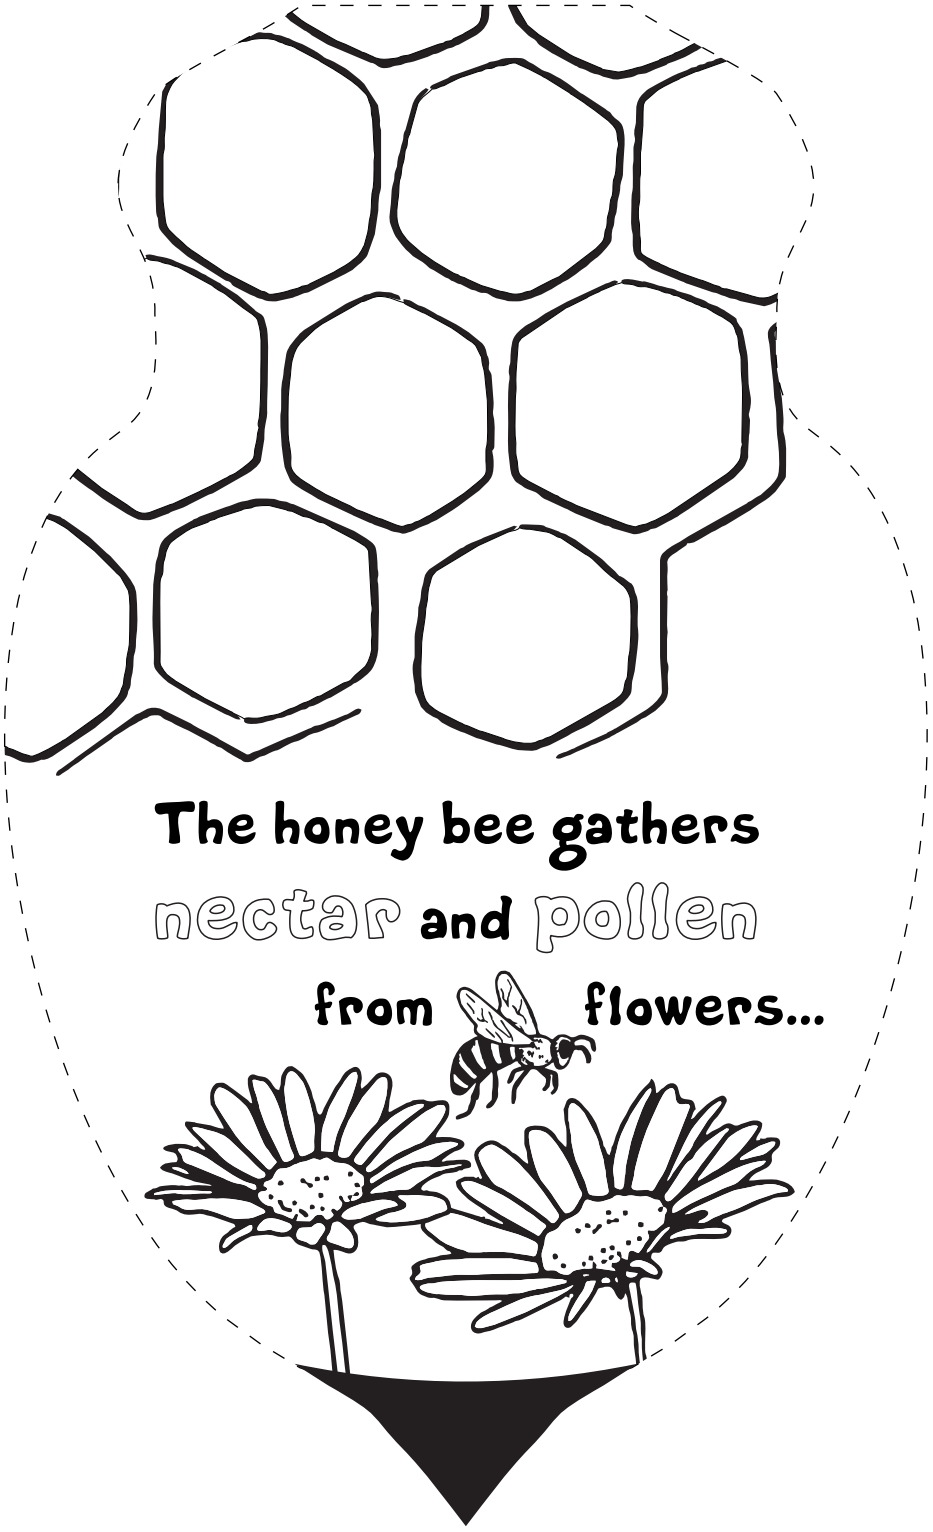


Page 4

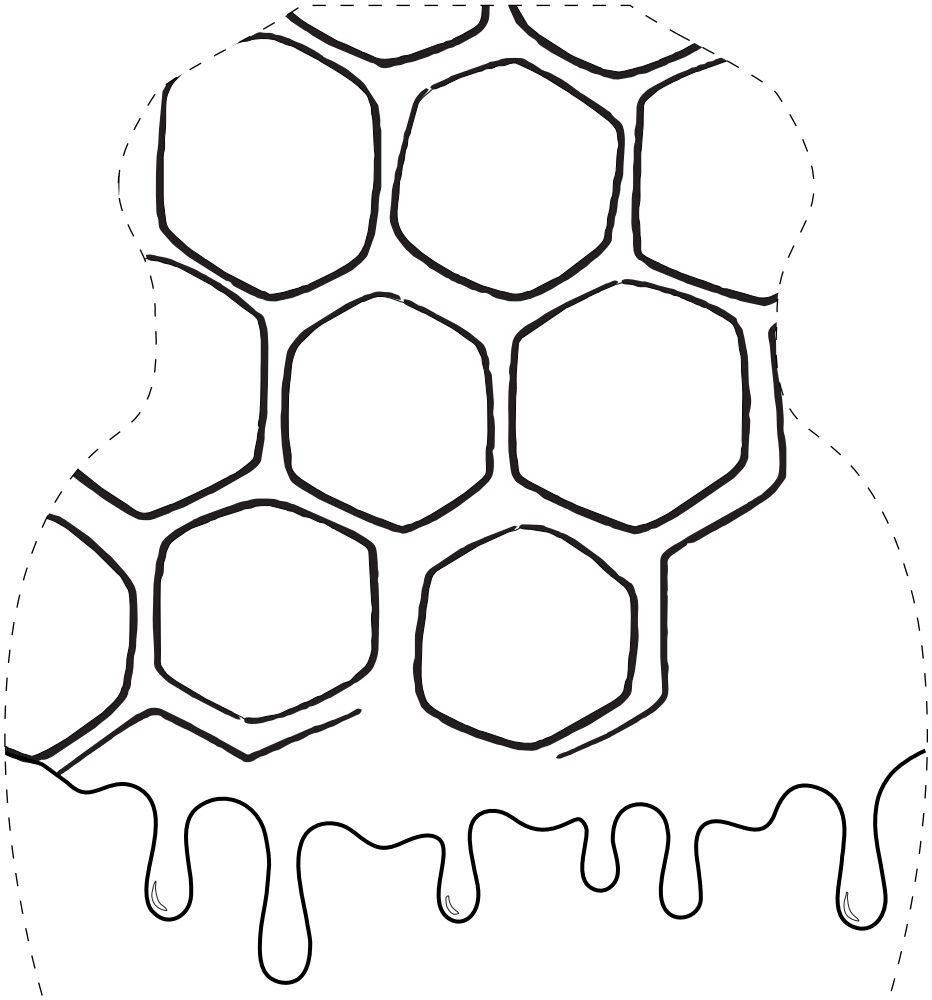


In 16 - 24 days the adult emerges from the capped cell

Page 5

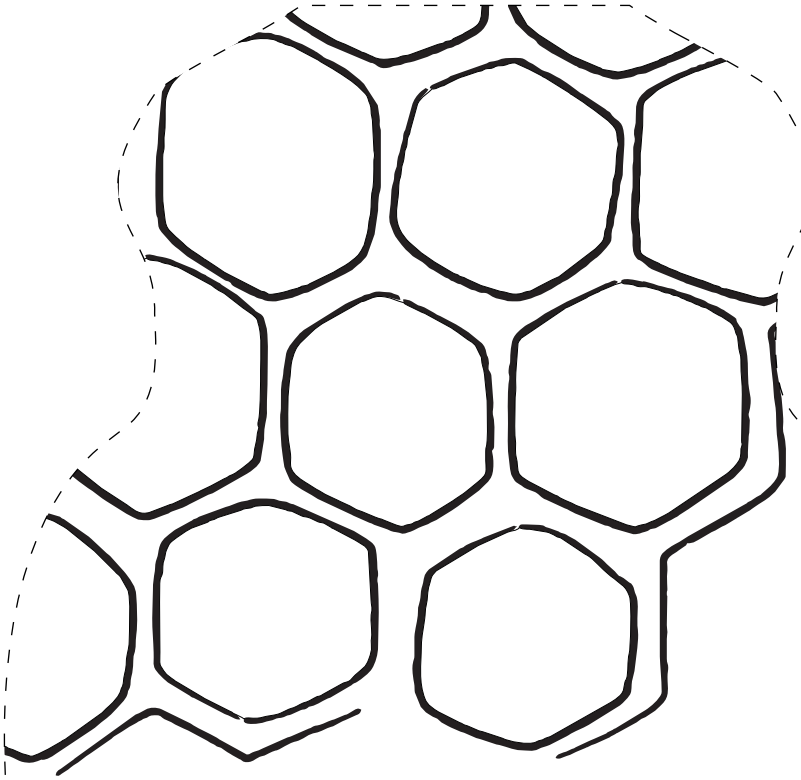


Page 6



...to take back to the hive and make honey to feed the larvae

Page 7



Honey made by bees is also
enjoyed by people,
animals and insects
